Portfolio: [ibagarrido-portfolio](#)

Performance-driven Full Stack Developer with hands-on experience in high-concurrency desktop apps and data-heavy web platforms (C#, React, Next.js, TypeScript). Skilled in real-time UI optimization and AI engineering tools to accelerate delivery, with strong adaptability to asynchronous, international teams.

PROFESSIONAL EXPERIENCE

IRISBOND San Sebastián, Spain (Jan 2026 - Apr 2026)

Software Developer Intern (C# / .NET)

- Engineered "HiruSystray", a multithreaded Windows application in C# for eye-tracking hardware calibration, eliminating UI thread blocking and ensuring zero-latency performance.
- Implemented advanced gaze-control algorithms (Dwell) with custom cursor-smoothing filters and tolerance zones to achieve 100% accessible navigation.
- Developed real-time video/avatar positioning modules and interactive calibration UI components used by global assistive technology clients.

SMARTENDS Ghent, Belgium (Jan 2025 - Apr 2025)

Software Developer Intern (Python / IoT)

- Developed IoT backend modules in Python to process high-frequency sensor data for waste management and route optimization.
- Optimized a real-time monitoring platform visualizing fill levels, geographical patterns, and collection schedules, significantly reducing data processing latency.
- Collaborated in a cross-border team to deliver software features that directly improved collection efficiency and reduced operating costs.

TECHNICAL SKILLS

Languages & Frontend: JavaScript (ES6+), TypeScript, React.js, Next.js, HTML5/CSS3, Tailwind CSS, Sass.

Backend & Systems: C# (.NET Core), Python, Kotlin (Android Jetpack), RESTful APIs, Multithreading.

Architecture & Practices: Asynchronous Systems, UI Performance Profiling, Real-time Data Visualization.

Tools & DevOps: Git/GitHub, Docker, CI/CD pipelines, Cursor, Claude Code, GitHub Copilot.

SELECTED PROJECTS

Financial Analytics & Valuation Engine ([huntrvalue.me](#))

- Built a high-performance web platform processing complex financial models, Monte Carlo simulations, and real-time data visualizations using React, TypeScript, and Python.
- Designed responsive UI dashboards to display data-heavy metrics clearly without compromising client-side rendering speed under high data loads.

EDUCATION & CREDENTIALS

Higher Technician in Web Application Development (EQF Level 5)

2023 - 2025 IES Xabier Zubiri Manteo, San Sebastián, Spain

Higher Technician in Cross-Platform Application Development (EQF Level 5)

2025 - 2026 IES Xabier Zubiri Manteo, San Sebastián, Spain
