Full Stack Developer who works at both ends of the stack: multithreaded C#/.NET and WPF desktop software integrating directly with hardware, and React/TypeScript interfaces that stay fast under heavy data loads. Two international internships (Spain, Belgium) plus a financial analytics platform of my own in production. I use AI coding agents daily to ship faster without losing control of the code.

PROFESSIONAL EXPERIENCE

IRISBOND San Sebastián, Spain (Mar 2026 - Jun 2026)

Software Developer Intern (C# / .NET)

- Engineered "HiruSystray", a multithreaded Windows application in C# for eye-tracking hardware calibration, eliminating UI thread blocking and ensuring zero-latency performance.
- Implemented advanced gaze-control algorithms (Dwell) with custom cursor-smoothing filters and tolerance zones to achieve 100% accessible navigation.
- Developed real-time video/avatar positioning modules and interactive calibration UI components used by global assistive technology clients.

SMARTENDS Ghent, Belgium (Mar 2025 - Jun 2025)

Software Developer Intern (Python / IoT)

- Developed IoT backend modules in Python to process high-frequency sensor data for waste management and route optimization.
- Optimized a real-time monitoring platform visualizing fill levels, geographical patterns, and collection schedules, significantly reducing data processing latency.
- Collaborated in a cross-border team to deliver software features that directly improved collection efficiency and reduced operating costs.

TECHNICAL SKILLS

- Languages:** TypeScript, JavaScript, C#, Python
- Frontend & Desktop:** React.js, Next.js, WPF, Tailwind CSS
- Backend & Databases:** C# (.NET Core), PostgreSQL, Node.js, RESTful APIs
- Architecture & UX:** Asynchronous Systems, UI/UX Development, Multithreading, Performance Optimization.
- Tools & DevOps:** Git, Docker, CI/CD, AI-assisted Development (GitHub Copilot, Claude Code)

SELECTED PROJECT

HUNTR - Financial Analytics & Valuation Platform (<https://www.huntrvalue.me/>)

- Built and shipped a production platform for value investors: DCF calculator, Monte Carlo simulations, real-time market data.
- Owned the full stack end to end, from the Python data layer to the React/TypeScript interface, kept fast under heavy data loads.

EDUCATION & CREDENTIALS

Higher Technician in Cross-Platform Application Development (EQF Level 5)

2025 - 2026 IES Xavier Zubiri Manteo, San Sebastián, Spain

Higher Technician in Web Application Development (EQF Level 5)

2023 - 2025 IES Xavier Zubiri Manteo, San Sebastián, Spain
