

Ibai Garrido

Full Stack Developer

Experience

SmartEnds - Ghent, Belgium (2025)

Software Developer Internship

- Developed IoT software modules for waste management, reducing data processing time via Python and data analysis.
- Optimised a real-time monitoring platform for fill levels, patterns, locations and collection schedules.
- Implemented software improvements to optimise collection routes, reduce costs and advance sustainability.

IRISBOND - San Sebastian, Spain (2026)

Software Developer Internship

- Built HiruSystray, a multithreaded Windows app for eye-tracking hardware calibration, optimising performance and preventing UI freezes.
- Implemented gaze control algorithms (Dwell) with cursor smoothing filters and tolerance zones for 100% accessible Eyetracker navigation.
- Programmed real-time positioning modules (Avatar/Video) and interactive calibration systems.

My Profile

Full Stack Developer with experience in React, Kotlin and C#. Hands-on experience at developing web and mobile apps integrating APIs
